Job Category: Logistician

Ability to Obtain Security Clearance: YES

Currently Possess Security Clearance: NO

US Citizen: YES

Location: Eatontown, NJ

Relocation Available: No

% Travel: Up to 25%

Division: Network Operations Division

Logistician: Candidate will load, analyze and manage technical Logistics Data; conduct logistics support analysis and develop acquisition. Candidate will prepare input for and assure accuracy of Integrated Logistics Support (ILS) plans that define and detail planning and coordinating actions for ILS elements to assure properly phased logistics support throughout the lifecycle. Candidate will ensure that ILS plans and elements are integrated with configuration management, data management reliability, quality assurance, maintainability, standardization, engineering technical services, safety, human engineering factors and lifecycle costing. Candidate will prepare Logistic Support Analyses (LSA) task strategy, level of repair analysis, procurement plans, logistic requirements plans, maintenance plans and operation support plans. Candidate will review, make recommendation and submit input to system level planning documents such as ILS plans, development option papers, integrated test plans and reliability/maintainability plans. Candidate will establish appropriate acquisition interrelationships among requirements, resources, responsibilities and results by maintaining lines of communication and coordination. Candidate may become involved in spares engineering, spares support analyses and participate in product testing/validations. Candidate will interface with government and product contractors as well as attend and brief working groups, program design review, and technical interface meetings. Candidate will develop, update and coordinate all logistics documentation.

Education/Experience Requirements: Candidate must possess an Engineering degree and/or 6 yrs experience in the area of specialty. Candidate must be familiar with MIL-STD-1369, MIL STD 130, and MIL-STD-1388/1. Candidate must have good written and verbal reporting skills and expertise in Microsoft Office products.

Unique Requirements: Candidate must meet eligibility for a SECRET security clearance and access to classified information. Candidate must be willing to travel.
